New York City Metropolitan Area | (203) 909-1646 | meghana.drlnswamy@gmail.com | linkedin.com/in/meghana-swamy | meghana-l.github.io

PROFESSIONAL SUMMARY

Recent MS Business Analytics graduate (GPA: 3.84) driving AI business strategy and automation at ConvoSatya. Hands-on experience building data pipelines, BI dashboards, and AI-powered applications using SQL, Python, Power BI, and Tableau. Deployed production ML models and a RAG-based intelligence app end-to-end - from architecture to cloud hosting.

EDUCATION

Master of Science in Business Analytics

University of New Haven, West Haven, CT

Aug 2024 – May 2026

GPA: 3.84/4

Bachelor of Engineering in Information Science

BMS Institute of Technology & Management, Bengaluru, India

Aug 2019 – May 2023

GPA: 3.3/4

CORE COMPETENCIES

SQL | Python | Power BI | Tableau | ETL Pipelines | Data Modeling | Machine Learning | RAG Pipelines | Business Analysis | Agile | FastAPI | Docker | Data Warehousing | Stakeholder Communication | AI Business Strategy

TECHNICAL SKILLS

Tools & Platforms: Oracle APEX, PowerSchool SIS, SSMS, MS Office, ServiceNow, JIRA, GitHub, SharePoint, n8n, Vercel

Data & Reporting: SQL, Python, R, Power BI, Tableau, Advanced Excel, ETL, SSRS, OLAP, Data Warehousing, Data Modeling, AutoML (H2O.ai)

AI & Development: FastAPI, REST APIs, RAG Pipelines, LLM Integration, Vector Databases (Pinecone), Docker, Kubernetes, n8n

Methodologies: Agile, Scrum, Waterfall, UAT, QA, SDLC

PROFESSIONAL EXPERIENCE

AI Business Analyst

ConvoSatya | Connecticut, United States

Jun 2026 – Present

- Drive AI business strategy across automation, content, and product direction for FAUST (real-time scam detection) and OSM (private AI ideation platform), bridging technical execution with business decision-making.
- Lead and manage a team of interns, applying AI as a strategic lever to translate model capabilities into business-ready workflows and recommendations.

Data Administrator Intern

District Arts & Education | New Haven, CT

Jan 2026 – May 2026

- Identified a manual reporting bottleneck and automated it end-to-end using SQL and Oracle APEX, cutting report generation time from 4 hours to under 45 minutes - the first automated reporting system the organization had.
- Built ETL pipelines from scratch consolidating enrollment, attendance, and grade data from three sources into a single Oracle APEX dashboard, eliminating double-entry errors across 500+ student records; built Power BI and Tableau dashboards adopted by program leads for weekly operations reviews, replacing ad-hoc spreadsheet pulls.

Graduate Teaching Assistant

Dept. of Economics & Business Analytics, University of New Haven | West Haven, CT

Aug 2025 – May 2026

- Supported 2 professors across core and capstone Business Analytics coursework, delivering weekly R, SQL, and Power BI lab exercises to 50+ students.

PROJECT EXPERIENCE

ARIA – Autonomous Research & Intelligence Agent

Personal Project

Apr 2026

- Architected and shipped a full-stack AI stock intelligence app solo - RAG pipeline (BM25 + Vector, MMR Reranking), Groq LLaMA 3.3 70B, Pinecone, HuggingFace embeddings, live market APIs, deployed on Vercel and Render, with an automated n8n workflow refreshing the Pinecone vector DB every 6 hours to keep responses grounded in current market data.

Port Authority of NY & NJ Traffic Analytics & Forecasting

Capstone Project – University of New Haven

Jan 2026 – Apr 2026

- Analyzed 29,000+ daily traffic records across 8 facilities (2015–2025); built 3 predictive models in H2O.ai AutoML + scikit-learn and deployed them as REST endpoints via FastAPI, Docker, and Kubernetes (Minikube) - the only team to productionize results beyond a notebook.
